SecureCo BCS SIP Trunking Service with Avaya OneCloud Private – Issue 1.0

NOTICE

The SecureCo BCS SIP Trunking Service was compliance tested to interoperate with Avaya OneCloud Private.

The SecureCo BCS SIP Trunking service referenced here is designed for business customers with an Avaya SIP trunk solution. The service provides local and/or long distance PSTN calling via standards-based SIP trunks directly, without the need for additional TDM gateways and the associated maintenance costs.

The configuration for the SecureCo BCS SIP Trunking Service is managed by SecureCo. For additional information contact SecureCo at https://www.secureco.co/support

The configuration of Avaya OneCloud Private is managed by Avaya. Avaya personnel in need of configuration details can look for documentation at https://support.avaya.com or contact Avaya DevConnect at devconnect@avaya.com

Testing was conducted via the Avaya DevConnect Program.
