Beta 80 Group provides innovative software solutions for public safety, serving more than 65 Public Safety Answering Points (PSAPs) and 32 million citizens. The company offers top-quality Computer Aided Dispatch (CAD) and CT systems that are known for their reliability, flexibility and platform integration.

Beta 80 Group was founded in 1986 and its subsidiary, Beta 80 International, LLC, a Delaware Corporation, was founded in 2015. A privately-held company, Beta 80 has 520 employees with offices in Italy, the United States and Switzerland.

OFFERS

iO CAD

A software platform for public safety and control room management, iO CAD integrates with the Avaya Aura® Platform to provide computer-aided dispatch, radio integration and reporting services for 911 organizations, as well as emergency medical services, fire departments and private medical services. The iO platform is a highly scalable, configurable and customizable PSAP management application that uses the most advanced technologies on the market. Leveraging a single, easy-to-use CAD interface, 911 call takers and dispatchers can streamline incident and dispatch management, as well as efficiently handle data delivered in compliance with National Emergency Number Association (NENA) and Association of Public Safety Communications Officials (APCO) standards.

iO CAD integrates with the Avaya Aura Platform in either a server-to-server or client-level CTI configuration. Server-to-server provides PSAPs with full-featured telephony integration directly from within the CAD and Call Taking interfaces, while client-level integration is much leaner, delivering telephony integration from the CAD interface only.

- **Compliant with:** Avaya Aura Communication Manager, Avaya Aura Application Enablement Services, Avaya Aura Call Center Elite, and Avaya one-X® Agent
- **Offer Solution Category:** Public Safety & E911
