

End of Sale Notice

Notification date: 1 November 2016
Effective date: 31 Jan 2017
Subject: DevConnect Avaya Aura Basic Development Environment (BDE)
License Key Renewals
Theatre/Region: Global

Summary:

Avaya is announcing End of Sale (EoS) for all new sales of the license keys necessary to support the DevConnect-provided Avaya Aura Basic Development Environment (BDE) configuration. DevConnect had previously announced End of Sale of new instances of the Avaya Aura BDE configuration effective 1 September 2016, and continued to offer opportunities to renew associated license keys for existing installations.

Effective **31 January 2017**, Avaya will no longer sell (make commercially available) the expiring/renewable license keys necessary for the DevConnect Avaya Aura BDE configuration.

Furthermore, in line with the DevConnect Procurement payment processes, **all payments for renewed license key orders must be received by 15 February 2017**, or the pending order will be cancelled.

Currently installed 2H CY16 license keys are valid until 31 December 2016. New renewed license keys for 1H CY17, ordered before the End of Sale Date, will remain valid until 31 July 2017. There will not be any further opportunity to obtain additional renewed license keys after that date.

Due to the older version of Avaya Aura software contained within the BDE configuration, and the associated End of Sale of those software elements themselves, Members who need lab systems for development purposes are encouraged to purchase current Avaya Aura Stack offers from their Avaya account team, authorized Avaya channel partners, or as part of enhanced DevConnect membership benefits.
