Spectralink PIVOT 87-Series Wireless Telephones

Smartphone-like usability in a reliable and durable mobile handset

Bring your own device (BYOD) has exploded into the workplace, opening up new opportunities for mobile workers while also raising new challenges for businesses. Organizations need an alternative from employee-owned devices that will deliver the security and reliability they need with the ease of familiarity employees want.

The PIVOT 87-Series Wireless Telephones, from DevConnect Technology Partner Spectralink, provide users with the perfect balance between smartphone-like usability and the quality and reliability needed in a work environment. Based on the industry-standard Android operating system, PIVOT telephones deliver enterprise-grade mobility with network reliability in a user-friendly interface.

Spectralink PIVOT Wireless Telephones, part of the DevConnect Select Product Program, integrate with Avaya call servers to deliver the benefits of desk-set quality voice telephony in a mobile device. The handsets interface with Avaya Aura® Communication Manager and the Avaya IP Office™ Platform to provide a market-leading unified communications solution.

- **Avaya Aura Communication Manager** is an open, extensible IP telephony platform that can be deployed as an IP PBX or feature server supporting a SIP-only environment, or as an evolution server supporting both SIP and non-SIP environments.

- **Avaya IP Office** is a simple, powerful collaboration solution for midsize companies that offers increased scale, flexible deployment options, simplified management, and support for enterprise branch deployments.

The PIVOT 87-Series Wireless Telephones deliver the quality, durability, and reliability in-building mobile workers need to stay productive throughout their day. Ideal for mobile workers in the healthcare, retail, hospitality, and manufacturing industries, PIVOT handsets can be tied to workplace applications to help improve workflow and increase job satisfaction. For organizations, PIVOT telephones help manage wireless performance, provide seamless integration with the call server, deliver secure performance, and protect their investment in communications infrastructure.

There are two models in the PIVOT 87-Series Wireless Telephones:

- PIVOT 8741 - Base model, available in blue or black
- PIVOT 8753 - Includes 1D/2D bar code scanner, available in blue or black

About DevConnect

The Avaya DevConnect Program provides a wide range of developer resources, including access to APIs and SDKs for Avaya products, developer tools, technical support options and training materials. Registered membership is free to anyone interested in designing Avaya-compatible solutions. Enhanced Membership options offer increased levels of technical support, compliance testing, and co-marketing of innovative solutions compatible with standards-based Avaya solutions.

To learn more, or register for membership, please visit www.avaya.com/devconnect.

About Avaya DevConnect Select Product Program

The DevConnect Select Product Program (SPP) offers a powerful portfolio of compliance-tested, Avaya-compatible products and services from established DevConnect Technology Partners. SPP products are handpicked for the SPP portfolio based on their strategic value and interoperability with Avaya technology. SPP products eliminate the hassle of managing multivendor relationships and are easy to order through the standard Avaya order processes.

Features

- Ergonomic grip
- Resistant to dust, shock, and liquid damage
- Android Jelly Bean operating system
- 802.11a/b/g/n
