# **Application Notes for Jabra SUPREME UC Bluetooth Headset with Avaya 9641G and 9670G IP Telephones - Issue 1.1**

### **Abstract**

These Application Notes describe the configuration steps required to integrate the Jabra SUPREME UC Bluetooth Headset with Avaya 9641G and 9670G IP Telephones. The Avaya 9641G and 9670G IP Telephones provide integrated Bluetooth support. The Jabra wireless headset allows users to answer, end, and mute/unmute calls directly from the headset.

Information in these Application Notes has been obtained through DevConnect compliance testing and additional technical discussions. Testing was conducted via the DevConnect Program at the Avaya Solution and Interoperability Test Lab.

# 1. Introduction

These Application Notes describe the configuration steps required to integrate the Jabra SUPREME UC Bluetooth Headset with Avaya 9641G and 9670G IP Telephones. The Avaya 9641G and 9670G IP Telephones provide integrated Bluetooth support. The Jabra wireless headset allows users to answer, end, and mute/unmute calls directly from the headset.

## 2. General Test Approach and Test Results

DevConnect Compliance Testing is conducted jointly by Avaya and DevConnect members. The jointly-defined test plan focuses on exercising APIs and/or standards-based interfaces pertinent to the interoperability of the tested products and their functionalities. DevConnect Compliance Testing is not intended to substitute full product performance or feature testing performed by DevConnect members, nor is it to be construed as an endorsement by Avaya of the suitability or completeness of a DevConnect member's solution.

Avaya's formal testing and Declaration of Conformity is provided only on the headsets/handsets that carry the Avaya brand or logo. Avaya may conduct testing of non-Avaya headset/handset to determine interoperability with Avaya phones. However, Avaya does not conduct the testing of non-Avaya headsets/handsets for: Acoustic Pressure, Safety, Hearing Aid Compliance, EMC regulations, or any other tests to ensure conformity with safety, audio quality, long-term reliability or any regulation requirements. As a result, Avaya makes no representations whether a particular non-Avaya headset will work with Avaya's telephones or with a different generation of the same Avaya telephone.

Since there is no industry standard for handset interfaces, different manufacturers utilize different handset/headset interfaces with their telephones. Therefore, any claim made by a headset vendor that its product is compatible with Avaya telephones does not equate to a guarantee that the headset will provide adequate safety protection or audio quality.

The interoperability compliance test included feature and serviceability testing. The feature testing focused on placing calls to and from the Avaya 9641G/G9670G IP Telephones using the Jabra headset and verifying two-way audio. The call types included calls to voicemail, to local extensions, and to the PSTN.

The serviceability testing focused on verifying the usability of the Jabra SUPREME UC Bluetooth Headset after restarting the Avaya 9641G/9670G IP Telephones and pairing (and disconnecting) the headset with the phone using Bluetooth.

## 2.1. Interoperability Compliance Testing

All test cases were performed manually. The following features were verified:

- Placing calls to the voicemail system. Voice messages were recorded and played back to verify that the playback volume and recording level were good.
- Placing calls to internal extensions to verify two-way audio.
- Placing calls to the PSTN to verify two-way audio.
- Answering and ending calls using the call control button on the headset.
- Using the volume control buttons on the Jabra headset to adjust the audio volume.
- Using the mute control button on the Jabra headset to mute and un-mute the audio.

For the serviceability testing, the Jabra headset was paired with the 9641G/9670G IP telephone using Bluetooth and removed from the Bluetooth device list on the phone. In addition, the 9641G/9670G IP phone was restarted to verify proper operation of the headset after the reboot was completed.

## 2.2. Test Results

All test cases passed.

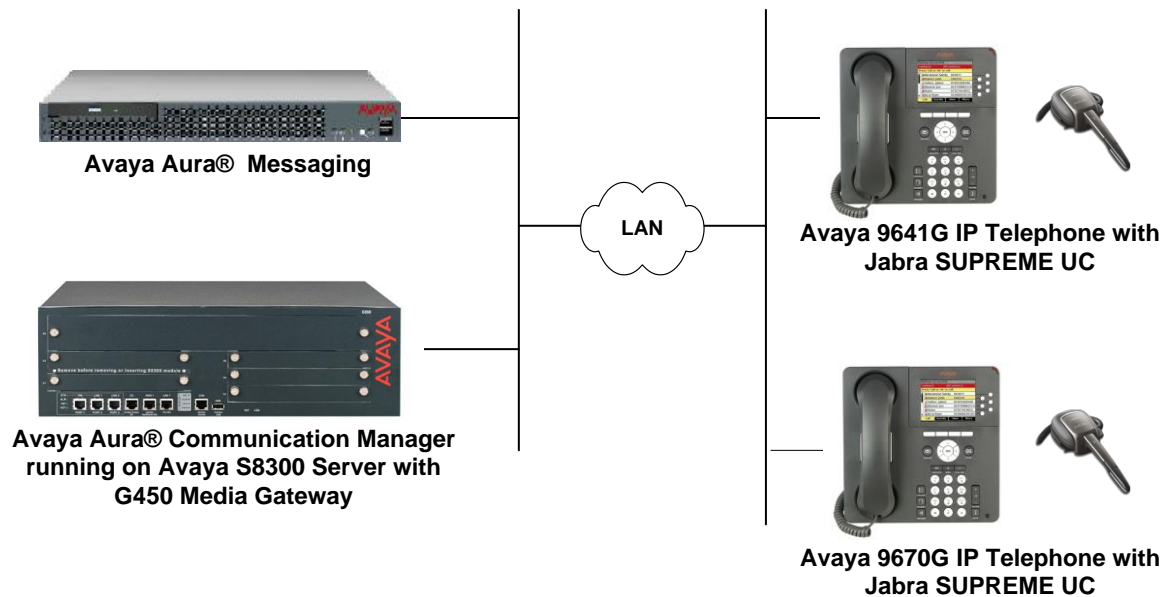

## 2.3. Support

For support on this Jabra headset solution, contact Jabra Technical Support at:

- Phone: (866) 697-8757
- Website: <http://www.jabra.com/NA-US/Support/pages/Default.aspx>
- Email: [JabraSupport.US@jabra.com](mailto:JabraSupport.US@jabra.com)

### 3. Reference Configuration

**Figure 1** illustrates the test configuration used to verify the Jabra SUPREME UC Bluetooth Headset with Avaya 9641G/9670G IP Telephones. The configuration consists of an Avaya S8300 Server running Avaya Aura® Communication Manager with an Avaya G450 Media Gateway providing connectivity to the PSTN via an ISDN-PRI trunk (not shown). Avaya Aura® Messaging was used as the voicemail system. The Jabra headset was paired with the 9641G/9670G IP telephones as a Bluetooth device.

**Figure 1: Avaya 9641G/9670G IP Telephones with Jabra SUPREME UC Bluetooth Headset**

### 3.1. Answering, Ending, and Placing Calls

To answer, end, or place a call using the Jabra headset follow the instructions below.

- To Answer a Call
- If the headset button on the IP telephone is not activated, press the headset button on the phone or the call control button on the headset to answer an incoming call.
  - If auto-answer is enabled and the headset button on the IP telephone is activated, subsequent incoming calls will be answered automatically and a two-way audio path will be established to the headset.
- To End a Call
- Press the headset button on the IP telephone or the call control button on the headset to terminate a call.
- To Place a Call
- Activate the headset button on the IP telephone to get dial tone and dial the number.

## 4. Equipment and Software Validated

The following equipment and software were used for the sample configuration provided:

Equipment/Software	Release/Version
Avaya Aura® Communication Manager running Avaya S8300 Server with a G450 Media Gateway	6.0.1 SP 5.01 (R016x.00.1.510.1 w/Patch 19303)
Avaya Aura® Messaging	6.0.1 SP 1
Avaya 9600 Series IP Telephones <ul style="list-style-type: none"><li>▪ Avaya 9641G IP Telephone</li><li>▪ Avaya 9670G IP Telephone</li></ul>	6.2009 (H.323) 3.1 SP 2 (H.323)
Jabra SUPREME UC Bluetooth Headset	2.2.56

## 5. Configure Avaya Aura® Communication Manager

This section covers the station configuration for the 9641G/9670G IP Telephone. The configuration is performed via the System Access Terminal (SAT) on Communication Manager. The procedures include:

- Configuring a station for the 9641G/9670G IP telephones
- Pairing the Jabra headset with the IP telephones.
- Removing the Jabra headset from the IP telephone Bluetooth device list, when necessary.

### 5.1. Configure a Station for Avaya 9641G/9670G IP Telephones

Use the **add station** command to create a station for the 9641G/9670G IP telephones. Set the **Type** field to the station type to be emulated. In this example, *9640* was used. Set the **Port** field to *IP* and configure a **Security Code** as that password to be used by the Avaya telephone to log in.

**Note:** To enable Auto Answer on the IP telephone set the **Auto Answer** field on **Page 2** (not shown) to the appropriate value, such as *all*.

## 5.2. Pair Jabra Headset with IP Telephone

After the 9641G/9670G IP telephones are configured and in-service, start the Bluetooth pairing process as described below. The 9641G/9670G IP telephones provide a touch-screen.

**Note:** If the headset does not pair or connect to the 9641G/9670G IP phone, follow the procedure in the next section to reset the Bluetooth device list.

1. On the 9641G/9670G, press the **Home** button and then select the **Settings** icon on the touch-screen.
2. Select **Bluetooth Setup** and then select **Add** to add a Bluetooth device.
3. Select **Other Headset**.
4. Now, start the Bluetooth pairing process on the headset. Turn off the headset and then turn it back on by flipping the boom arm while simultaneously pressing the call control button on the headset. The “Welcome, you are now ready for pairing...” voice prompt is heard on the Jabra headset.
5. On the 9641G/9670G, select **Start** to start the pairing process.
6. Wait 5-15 sec. while the devices discover each other. The 9641G/9670G will display “Looking for Bluetooth device” on the touch-screen.
7. Once found, the 9641G/9670G will display the device found. It will indicate “Device: Jabra SUPREME v2.2.56”.
8. On the 9641G/9670G, select **Next**.
9. Wait while the Passkey is processed. The 9641G/9670G will automatically try common Bluetooth Passkeys, such as ‘0000’. The Jabra headset uses ‘0000’ by default so the headset should be paired successfully without any further action by the user.
10. When the pairing process is complete, the 9641G/9670G will display, “Your Bluetooth device paired” and the Jabra headset will announce, “Connected”.

## 5.3. Removing Headset from 9670G Bluetooth Device List

To remove the headset from the 9641G/9670G Bluetooth device list, follow these instructions.

**Note:** This procedure may be necessary if the headset will not pair or connect to the 9641G/9670G IP telephones and the user would like to restart the pairing process. Pairing information for devices previously paired with the headset will be lost.

1. On the 9641G/9670G, press the **Home** button and then select the **Settings** icon on the touch-screen.
2. Select **Bluetooth Setup** and follow the prompts to remove the headset from the list.

## 6. Configure Jabra SUPREME UC

No configuration is required for the Jabra headset. However, the Jabra headset does have to be paired with the 9641G/9670G IP phone as a Bluetooth device using the default Passkey on the headset, which is '0000'. Once the headset has been paired, it will be ready for calls. See reference [4] for pairing instructions. In summary, to initiate Bluetooth pairing on the Jabra headset, turn off the headset and then turn it back on by flipping the boom arm while simultaneously pressing the call control (answer/end) button. The user should hear the "Welcome, you are now ready for pairing..." announcement.

## 7. Verification Steps

Verify that the Jabra headset has been paired with the 9641G/9670G IP telephones using Bluetooth by viewing the Bluetooth device list on the phone under **Bluetooth Setup**. Once the headset is connected to the phone, verify that incoming and outgoing calls are established with two-way audio to the headset and that the headset can get dial tone and end an active call.

## 8. Conclusion

These Application Notes describe the configuration steps required to integrate the Jabra SUPREME UC Bluetooth Headset with Avaya 9641G/9670G IP Telephones. All test cases were completed successfully.
