Offers

SIP Enabled *i* turret

Compliant with: Avaya SIP Enablement Services

Offer Solution Category: Hosted Solutions, IP Telephony, Trading Turrets

Primary Industries Served: Capital Markets, Banking, Utilities

Speakerbus' *i* turret provides cost effective communications for the financial services and command & control industries. By minimising the traditional turret back room equipment footprint, clients can reduce cost, remove complexity and optimise support skills. The *i* turret offers, multi-party line sharing with barge in, adaptive pagination, conferencing, integrated dynamic speakers and support for private lines, hoots and radio services. Incorporating a feature set that delivers traditional turret functionality, Speakerbus has created new standards for ease of use and operational flexibility with an innovative implementation of SIP & IP technologies. Speakerbus' *i* turret offers a tightly integrated front and back office solution with common voice mail, voice recording and line sharing between turrets and phone sets. The *i* turret gives users access to Avaya mobility solutions, unified communications and CTI, resulting in an enhanced return on investment.
