# AT&T IP Flexible Reach SIP Trunking Service with Avaya OneCloud™ CPaaS and Avaya OneCloud™ CCaaS – Issue 1.0

## NOTICE

The AT&T IP Flexible Reach SIP Trunking Service was compliance tested to interoperate with Avaya OneCloud™ Communications Platform as a Service (Avaya CPaaS) and Avaya OneCloud™ Contact Center as a Service Public (Avaya CCaaS).

The AT&T IP Flexible Reach SIP Trunking Service referenced here is designed for business customers using Avaya CPaaS/CCaaS services, wishing to use AT&T IP Flexible Reach SIP Trunking Service as their SIP Trunk carrier, as referenced in Avaya's Bring Your Own Carrier (BYOC) program. The AT&T IP Flexible Reach SIP Trunking Service connects directly to Avaya CPaaS and provides PSTN access for Avaya CCaaS agents.

The configuration for the AT&T IP Flexible Reach SIP Trunking Service is managed by AT&T. For additional information, follow the Contact links provided by AT&T at <https://www.business.att.com/products/sip-trunking.html>

The configuration for Avaya CPaaS is managed by Avaya. For information on Avaya OneCloud™ CPaaS solution visit <https://www.avaya.com/en/products/cpaas/>

The configuration for Avaya CCaaS is managed by Avaya. For information on Avaya OneCloud™ CCaaS Public solution visit <https://www.avaya.com/en/products/ccaas/public/>

Testing was conducted via the Avaya DevConnect Program. For additional information, send an e-mail to the Avaya DevConnect Program at [devconnect@avaya.com](mailto:devconnect@avaya.com).
