# **Application Notes for Plantronics Voyager PRO UC WG200/B Wireless Headset System with Avaya IP Softphone, Avaya IP Agent and Avaya one-X® Communicator - Issue 1.0**

### **Abstract**

These Application Notes describe a compliance-tested configuration comprised of Plantronics Voyager PRO UC WG200/B Wireless Headset System with Avaya IP Softphone, Avaya IP Agent, Avaya one-X® Communicator and Avaya Aura™ Communication Manager. Designed for mobile professionals in the office or on-the-go, this single headset enables seamless switching between calls received on the PC and those received on the mobile phone.

Information in these Application Notes has been obtained through DevConnect compliance testing and additional technical discussions. Testing was conducted via the DevConnect Program at the Avaya Solution and Interoperability Test Lab.

# 1. Introduction

These Application Notes describe the configuration steps required for Plantronics Voyager PRO UC WG200/B Wireless Headset System with Avaya IP Softphone, Avaya IP Agent, Avaya one-X® Communicator and Avaya Aura™ Communication Manager. Designed for mobile professionals in the office or on-the-go, this single headset enables seamless switching between calls received on the PC and those received on the mobile phone. The Plantronics Voyager PRO UC WG200/B Wireless Headset System consists of the BUA-200 USB Bluetooth Adapter and the WH200/B Voyager PRO Headset.

## 1.1. Interoperability Compliance Testing

Avaya's formal testing and Declaration of Conformity is provided only on the headsets/handsets that carry the Avaya brand or logo. Avaya may conduct testing of non-Avaya headset/handset to determine interoperability with Avaya phones. However, Avaya does not conduct the testing of non-Avaya headsets/handsets for: Acoustic Pressure, Safety, Hearing Aid Compliance, EMC regulations, or any other tests to ensure conformity with safety, audio quality, long-term reliability or any regulation requirements. As a result, Avaya makes no representations whether a particular non-Avaya headset will work with Avaya's telephones or with a different generation of the same Avaya telephone.

Since there is no industry standard for handset interfaces, different manufacturers utilize different handset/headset interfaces with their telephones. Therefore, any claim made by a headset vendor that its product is compatible with Avaya telephones does not equate to a guarantee that the headset will provide adequate safety protection or audio quality.

The interoperability compliance test included feature and serviceability testing. The feature testing focused on placing calls to and from Avaya IP Softphone, Avaya IP Agent and Avaya one-X Communicator using the Plantronics Voyager PRO UC WG200/B Wireless Headset System and verifying good talk path in both directions. The type of calls made included calls to voicemail, to internal extensions and to the PSTN.

The serviceability testing focused on verifying the usability of the Plantronics Voyager PRO UC WG200/B Wireless Headset System after restarting the Avaya softphone applications, disconnecting and reconnecting the Headsets and rebooting the PC.

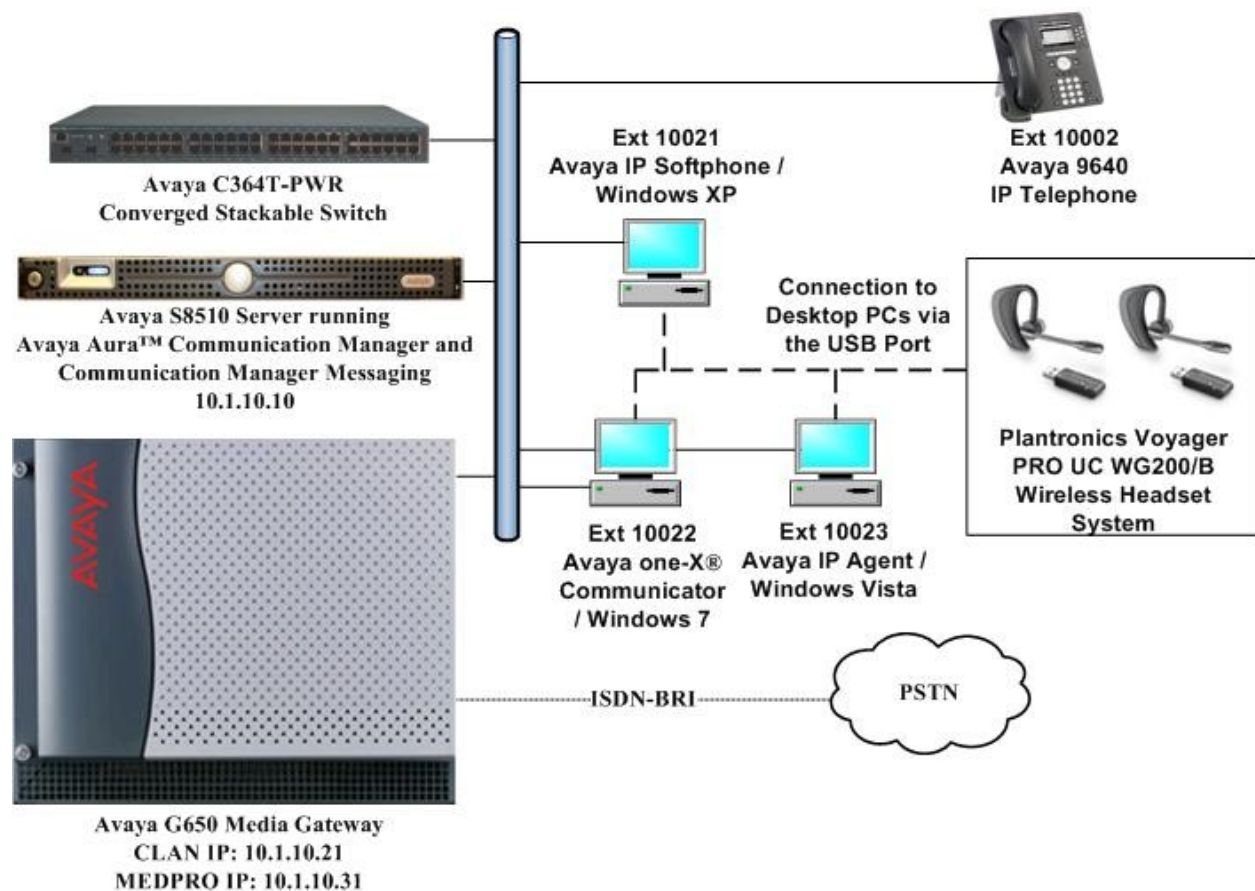

## 1.2. Support

For technical support and information on Plantronics headsets, contact Plantronics at:

- Phone: 800-544-4660 (toll free), +1 831-426-5858 (International)
- Website: [http://www.plantronics.com/north\\_america/en\\_US/support/](http://www.plantronics.com/north_america/en_US/support/)

## 2. Reference Configuration

**Figure 1** illustrates the test configuration used to verify the Plantronics solution. The configuration comprised of an Avaya S8510 Server running Avaya Aura™ Communication Manager and an Avaya G650 Media Gateway with connections to the following: an Avaya 9640 IP Telephone and an ISDN-BRI trunk to the PSTN. Avaya Aura™ Communication Manager Messaging was used as the voicemail system. Avaya IP Softphone, Avaya IP Agent and Avaya one-X Communicator were installed on three desktop PCs respectively, each having a Plantronics BUA-200 USB Bluetooth Adapter attached to the USB Port of the desktop PC. The Avaya C364T-PWR Converged Stackable Switch provides Ethernet connectivity to the Avaya Server, Media Gateway, desktop PCs and IP telephone.

**Figure 1: Test Configuration**

### 3. Equipment and Software Validated

The following equipment and software were used for the sample configuration provided:

Equipment	Software
Avaya S8510 Server	Avaya Aura™ Communication Manager 5.2.1 (R015x.02.1.016.4) with Service Pack (02.1.016.4-17959)
Avaya G650 Media Gateway <ul style="list-style-type: none"><li>• TN2312BP IP Server Interface</li><li>• TN799DP C-LAN Interface</li><li>• TN2302AP IP Media Processor</li></ul>	- HW07, FW049 HW01, FW034 HW20, FW120
Avaya IP Softphone running on Microsoft Windows XP Professional SP3 (32-bit) PC	R6.0 SP7 (6.01.93)
Avaya IP Agent running on Microsoft Windows Vista Business SP2 (32-bit) PC	R7.0 SP8 (7.0.38.124)
Avaya one-X Communicator running on Microsoft Windows 7 Professional (32-bit) PC	5.2 SP2 (5.2.0.16)
Avaya 9640 IP Telephone	3.1.1 (H.323)
Avaya C364T-PWR Converged Stackable Switch	4.5.18
Plantronics Voyager PRO UC WG200/B Wireless Headset System <ul style="list-style-type: none"><li>- BUA-200 USB Bluetooth Adapter</li><li>- WH200/B Voyager PRO Headset</li></ul>	USB Version 635 -
Plantronics Unified Runtime Engine	2.0.31611.1
Plantronics Control Panel	2.0.31611.1

### 4. Configure Communication Manager

The following sections show the relevant configuration screens for Communication Manager. The screen shots included in this section focused only on the configuration of the station and ip-codec-set forms. The configuration is performed via the System Access Terminal (SAT) on Communication Manager.

## 4.1. Configure Station for Avaya IP Softphone or Avaya one-X Communicator

Use the **add station n** command; where **n** is an available extension in the dial-plan. To create a station to be used by Avaya IP Softphone or Avaya one-X Communicator, the following information should be provided:

- **Type:** The IP Telephone type that will be emulated. In this compliance testing, the type was set to **2420**.
- **Security Code:** Password used by Avaya IP Softphone or Avaya one-X Communicator to log in.
- **Port:** Set to **X** to administer the station without hardware.
- **IP SoftPhone?:** **y**

add station 10023		Page 1 of 6

## 4.2. Configure Station for Avaya IP Agent

Use the **add station n** command; where **n** is an available extension in the dial-plan to create a new station to be used by Avaya IP Agent. Configure the following:

- **Type:** The IP Telephone type that will be emulated. In this compliance testing, the type was set to **2420**.
- **Security Code:** Password used by Avaya IP Agent to log in.
- **Port:** Set to **X** to administer the station without hardware.
- **IP SoftPhone?:** y

```

### 4.3. Configure IP Codec Set

The following screen shows the codec set configuration that was used during the test. To configure the codec set, use the **change ip-codec-set n** command, where **n** is the IP codec set used by the Avaya softphone applications. In this compliance testing, the G.722-64K and G.711 mu-law codec were used.

change ip-codec-set 1

## 5. Configure Avaya IP Softphone

After logging into Avaya IP Softphone, select **Audio → Tuning Wizard** from the menu as shown below.

Plantronics BUA-200 USB Bluetooth Adapter is automatically detected in Microsoft Windows as **BUA-200**. Select this device as the **Primary Playback Device** and **Recording Device** as shown below. Select **Next**.

Select **Headset or Handset**. Click **Next** and follow the remaining procedures to tune the audio.

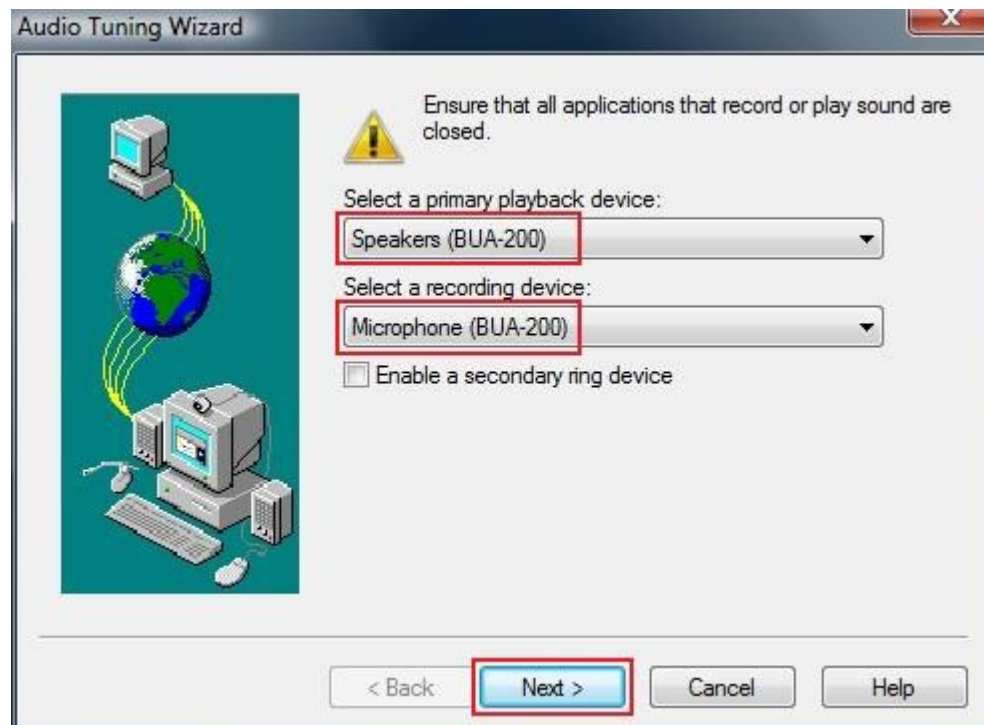

## 6. Configure Avaya IP Agent

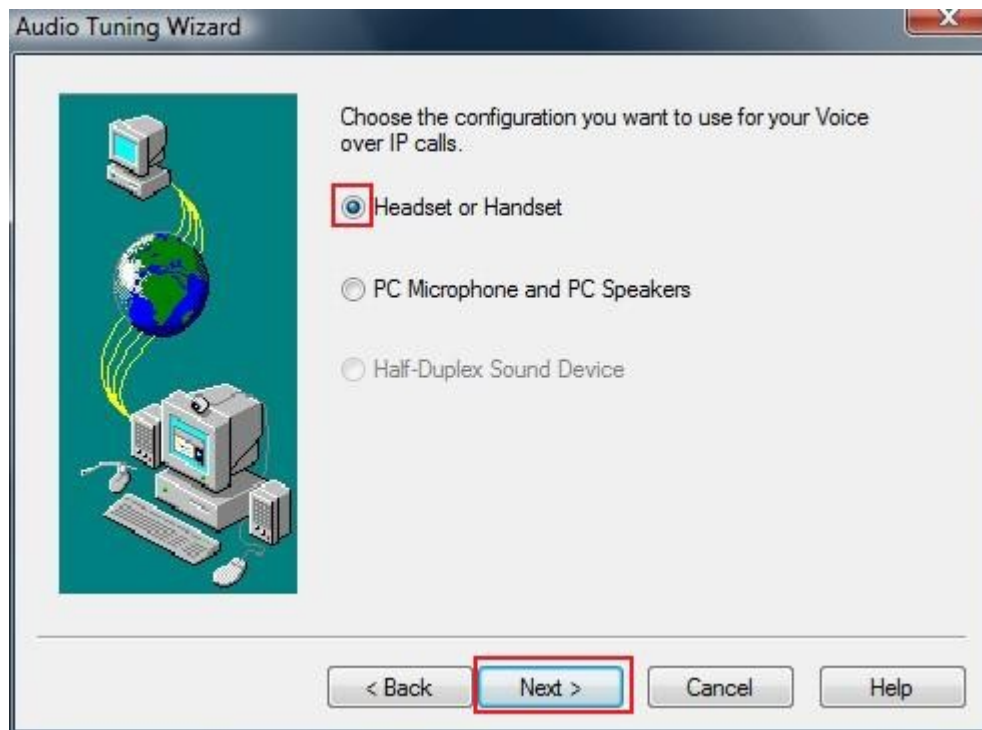

After logging into Avaya IP Agent, select **Audio** → **Tuning Wizard** from the menu as shown below.

Plantronics BUA-200 USB Bluetooth Adapter is automatically detected in Microsoft Windows as **BUA-200**. Select this device as the **Primary Playback Device** and **Recording Device** as shown below. Select **Next**.

Select **Headset or Handset**. Click **Next** and follow the remaining procedures to tune the audio.

## 7. Configure Avaya one-X Communicator

After logging into Avaya one-X Communicator, select  → **Settings** → **General Settings** from the menu as shown below.

Select **Audio** from the left panel and click the **Basic** tab. Click **Audio Tuning Wizard**.

Plantronics BUA-200 USB Bluetooth Adapter is automatically detected in Microsoft Windows as **BUA-200**. Select this device as the **Playback Device** and **Recording Device** as shown below. Click **Next** and follow the remaining procedures to tune the audio.

## 8. Configure Plantronics Voyager PRO UC WG200/B Wireless Headset System

The Plantronics BUA-200 USB Bluetooth Adapters are plug-and-play USB devices. When plugged into the USB Port of the desktop PC, they are automatically detected in Microsoft Windows without requiring any additional driver software. In this test configuration, the BUA-200 USB Bluetooth Adapters are detected as **BUA-200** in Windows XP, Windows Vista and Windows 7.

The WH200/B Voyager PRO Headset and BUA-200 USB Bluetooth Adapter are supplied paired to each other. To use a replacement headset with the existing USB adapter, refer to [5] for the pairing instructions.

## 8.1. Install Plantronics Unified Runtime Engine

The Plantronics Unified Runtime Engine enables the Plantronics Voyager PRO UC WG200/B Wireless Headset System to answer and end calls using the call control button on the Voyager PRO headset. The following describes the steps to install the Plantronics software.

- Log into an account that is a member of the Administrators group.
- Insert the Plantronics CD-ROM and execute **setup.exe**. This is a bootstrap application which will download the latest version of the software from the Plantronics website. An internet connection is required.
- When prompted for the **Setup Type**, select **Typical**. This will install the Unified Runtime Engine, Control Panel, Update Manager and connectivity for all supported softphone applications.
- Follow the on-screen instructions to install the software.

## 9. General Test Approach and Test Results

All test cases were performed manually. The following features were verified:

- Placing calls to the voicemail system. Voice messages were recorded and played back to verify that the playback volume and recording level were good.
- Placing calls to internal extensions to verify that the playback volume and recording level were good.
- Placing calls to the PSTN to verify that the playback volume and recording level were good.
- Answering and ending calls using the call control button on the Voyager PRO headset.
- Using the volume control buttons on the Voyager PRO Headset to adjust the playback volume.
- Using the mute control button on the Voyager PRO Headset to mute and un-mute the recording level.

For the serviceability testing, the BUA-200 USB Bluetooth Adapters were disconnected and reconnected to verify proper operation. Avaya IP Softphone, Avaya IP Agent and Avaya one-X Communicator were also restarted for the same purpose. The desktop PCs were also rebooted to verify that the Plantronics Unified Runtime Engine process starts automatically when the PC comes back into service.

All test cases passed successfully.

## 10. Verification Steps

From the Windows Control Panel, open **Sounds and Audio Devices** and click the **Audio** tab. Verify that the device **BUA-200** is listed in both the **Sound playback** and **Sound recording** section as shown below.

## 11. Conclusion

These Application Notes describe the configuration steps required for Plantronics Voyager PRO UC WG200/B Wireless Headset System to work with Avaya IP Softphone, Avaya IP Agent and Avaya one-X® Communicator. All test cases were completed successfully.
